2:00-5:00pm

Technology Trends Affecting Higher Education Today and Tomorrow
Presenters: Vickie Cook & Michele Gribbins (University of Illinois Springfield)

From cloud-based resources and wearable technologies to augmented and virtual reality and autonomous vehicles, a steady stream of technological advances is impacting learning in unexpected ways. Bring your laptop or mobile device and engage through robust discussion and activities to explore the latest trends in learning technologies.

.....

From Ideas to Action: Tools for Implementing Learning Innovation
Presenters: Stacy Southerland & Bucky Dodd (University of Central Oklahoma)

Innovation is a hot topic in education, but how do we make it happen on a practical level? This hands-on, interactive workshop introduces approaches to identifying personal and organizational drivers of innovation and visual mapping techniques for planning and developing successful and sustainable results.

.....

Pedagogy First: Applying Evidenced-Based Practices to Innovative Online Course
Presenters: Krista Terry (Appalachian State University) and Nina Nussbaum-Jones (3D Immersive Collaboration Consulting, LLC)

New technologies can be exciting, and it's tempting to use the latest tools. However, instructors need to be mindful that the pedagogy and learning goals not be obscured by the wow factor. We will guide participants to identify technologies that align with their instructional goals and effectively engage students.
